Interest rates a large factor in Victoria real estate market

A total of 407 properties sold in the Victoria Real Estate Board region this October, 15.2 per cent fewer than the 480 properties sold in October 2022 and a 17.4 per cent decrease from September 2023. Sales of condominiums were down 7.2 per cent from October 2022 with 141 units sold. Sales of single family homes decreased 16.1 per cent from October 2022 with 193 sold.

“Overall, property sales drifted down in October compared to the previous month, likely due to consumers continuing to navigate interest rates higher than those seen in nearly two decades,” said Victoria Real Estate Board Chair Graden Sol. “The uncertainty around the direction of the Bank of Canada rate announcement in mid-October may have caused some buyers to push their purchasing plans into the future because it was unclear if rates were going to be hiked again or remain stable. Generally speaking, when we have periods of static interest rates, consumer confidence returns to the market. We can recall earlier in the year when rates plateaued; we saw an uptick in sales in the weeks after. However, when rates began to rise again, we saw consumer confidence falter.”

There were 2,756 active listings for sale on the Victoria Real Estate Board Multiple Listing Service® at the end of October 2023, an increase of 2.1 per cent compared to the previous month of September and a 25.7 per cent increase from the 2,192 active listings for sale at the end of October 2022.

“The good news in October was that we continued to see a slow and steady increase in the number of available properties for sale,” adds Sol. “This additional inventory is positive for buyers who will have more selection than they’ve experienced in recent years. The real estate market tends to slow down in late fall and winter, but there are still a good number of active buyers. If you’re thinking about making a move during the colder months, reach out to your local REALTOR® to plan your strategy.”

The Multiple Listing Service® Home Price Index benchmark value for a single family home in the Victoria Core in October 2022 was \$1,257,100. The benchmark value for the same home in October 2023 increased by 3.9 per cent to \$1,305,900, which is down from September’s value of \$1,312,200. The MLS® HPI benchmark value for a condominium in the Victoria Core area in October 2022 was \$575,300, while the benchmark value for the same condominium in October 2023 increased by 1.8 per cent to \$585,600, which is down from the September value of \$589,600.

About the Victoria Real Estate Board – Founded in 1921, the Victoria Real Estate Board is a key player in the development of standards and innovative programs to enhance the professionalism of REALTORS®. The Victoria Real Estate Board represents 1,649 local Realtors. If you are thinking about buying or selling a home, connect with your local Realtor for detailed information on the Victoria and area housing market.

Total new MLS® listings and total MLS® sales for entire district

Sales to Active Listings Ratio

This chart tracks the ratio of total residential sales over total active residential listings at month-end for each of the last 25 months.

Based on a regression analysis performed by the economics department at the BC Real Estate Association in each market area of the province, the Sales to Active Listings Ratio for Victoria can be interpreted as follows:

- below 14%, there is downward pressure on prices (buyers' market)
- above 20%, there is upward pressure on prices (sellers' market)
- in the 14-20% range, there is little pressure on prices either way (balanced market)

MLS® Home Price Index

The Victoria Real Estate Board uses the MLS® Home Price Index (MLS® HPI) to report on market trends. The MLS® HPI uses the concept of a benchmark home, a notional home with common attributes of typical homes in a defined area.

Through the analysis of over fifteen years of Victoria Real Estate Board MLS® sales data, the MLS® HPI defined benchmark homes for Victoria in each category (single family homes, townhouses, condos) and for each neighbourhood. The benchmark starting point was 2005, where each type of property and neighbourhood was assigned an index value of 100.

Why MLS® HPI?

Unlike average or median prices, which can fluctuate from one month to the next and potentially paint an inaccurate or even unhelpful picture of price values and trends, the MLS® HPI is based on the value home buyers assign to various housing attributes, like the age of the home and number of bedrooms. The evaluation of these attributes tends to evolve gradually over time, creating a more insightful analysis.

Sales to Active Listings Ratio

The ratio of counts of total residential sales over total active residential listings for the last 25 months

October 2023

Produced: 01-Nov-2023

The Sales to Active Listings Ratio

This chart tracks the ratio of total residential sales over total active residential listings at month-end for each of the last 25 months.

The active listing count and the sales count can be viewed as indicators of housing supply and demand respectively. Observing the ratio between them can thus help indicate a "buyers' market", where there is sustained downward pressure on prices, and a "sellers' market", where there is sustained upward pressure on prices.

Based on a regression analysis performed by the Economics Department of the BC Real Estate Association in each market area of the province, the Sales to Active Listings Ratio for Victoria can be interpreted as follows:

- below 14%, there is downward pressure on prices (buyers' market)
- above 20%, there is upward pressure on prices (sellers' market)
- in the 14-20% range, there is little pressure on prices either way (balanced market)
